

Imagine you are a bird with a long beak. Your task is to find food in flowers with deep nectar.

You are a chameleon. Your challenge is to blend into your surroundings to avoid predators.

Pretend you are a fish with gills. Explain how you breathe underwater.

You are a polar bear. Describe how your thick fur helps you survive in cold environments.

Imagine you are a cactus. Explain how you store water to survive in the desert.

You are a kangaroo. Describe how your strong legs help you move quickly to escape danger.

Pretend you are an elephant. Explain how your large ears help you stay cool.

You are a butterfly. Describe how your colorful wings help you attract mates.

Imagine you are a turtle. Explain how your hard shell protects you from predators.

You are a bat. Describe how you use echolocation to find food in the dark.
